

READING ROOM SOLUTIONS!

Available in many shapes and sizes to meet your ergonomic needs.

Get ergonomic, modular furniture, designed with PACS/PET challenges in mind. Configure our workstations exactly the way you want by putting shelves anywhere up and down the legs and adding accessories.

And let us do the work for you. We'll design configurations and room layouts for you.

Small enough to fit in crowded hospital rooms, the mobile POC Cart can be moved easily and shared between exam and operation environments. For this OR, the display has been mounted on an LCD Arm so optical images can be reviewed during surgery. Also includes Large and Small Equipment Shelves.

Sheldon uses the FIT Console so his four displays curve around him for easier viewing. The large keyboard shelf easily adjusts for sit-down or stand-up height, and anywhere in between.

MORE READING ROOM SOLUTIONS!

Reading room furniture system line comes in 30", 48", 60", & 72" widths, and are also incredibly strong. They easily hold up to 150 lbs.

Limited on space? Frank is able to fit two monitors and RIS onto a 36" wide AdjustaCart. Ideal for people of various heights, the keyboard shelf adjusts up and down so you can sit or stand during your work day. Place your CPU's on a Base Shelf below to keep the footprint of the station small.

Is your reading room growing? Spread out your four monitors on a 60" wide or 72" wide bench which can hold up to 600 lbs. Shown here on a 72" wide bench with LCD Arms, the displays can easily be moved together and brought closer to you.
